

When the time comes for the renewal of the license for WCHS and/or Sinclair Broadcasting Group, please consider the unwarranted censorship by the station and the group of Ted Koppel's Nightline episode in which he read the names of the casualties of the Iraq war. I understand that it is not up to the FCC to determine what or how a local station decides its broadcast schedule (except for certain election issues). It is part of the FCC's policy to protect freedom of speech under the First Amendment. Put me down as a viewer who wanted to see that particular broadcast and as one who does not appreciate Sinclair's deciding what I can and cannot see when it comes to national shows.
